EDUCATION

WeThinkCode, Cape Town, South Africa

Present-December 2026

Software Engineering Diploma NQF 6 (In progress)

Minor: Cloud Computing

Related Coursework: Engineering/DevOps: Unit, Acceptance, and Integration Testing (JUnit), Test-Driven Development (TDD), Version Control (Git, GitHub, PGP), CI/CD build pipelines (GitHub actions), Docker, Apache Maven, Client-Server Architecture (Sockets), Design Patterns, Coupling & Cohesion, Refactoring, Brownfield Development.

Agile/Soft Skills: Teamwork & Collaboration, Agile practices (Stand-ups, Iteration Planning, Retrospectives), Pair Programming, Technical Documentation, Presentations (Pecha Kucha).

University of Cape Town, Cape Town, South Africa

2016-2019

Bachelor's in Computer science NQF 7 (Incomplete)

Minor: Information Systems

Related Coursework: Object-Oriented Programming (Python, Java, C#), Data Structures and Algorithms, Big Data, Systems Analysis, Business Intelligence, Python, and MySQL

Agile/Soft Skills: Technical Systems Analysis, Peer Mentorship, Academic Collaboration, Cross-functional Communication, and Professional Report Writing.

Mbilwi Secondary School, Limpopo, South Africa

2015

National Senior Certificate NQF 4 (Complete)

Minor: English, Tshivenda, Life Orientation

Core Subjects: Mathematics, Physical Sciences, Life Sciences, Geography.

Honors: Completed Matric with 4 Distinctions

EXPERIENCE

Full Stack Developer

March 2020 – November 2024

Z15 Solutions, Pretoria, Gauteng

- Engineered dynamic web applications by developing responsive front-end interfaces and integrating them with back-end RESTful APIs to ensure seamless data flow and high-speed performance.
- Integrated technical SEO and accessibility standards by optimizing page metadata and structure to enhance search engine rankings and improve user inclusivity.

Senior Full Stack Developer

February 2019 – June 2020

Varsity Newspaper (University of Cape Town), Cape Town, Western Cape

- Architected the digital news platform using the Django framework and Agile methodologies to ensure high performance content delivery for the university community
- Led technical project cycles by writing clean code and performing peer code reviews to maintain high engineering standards and system security
- Mentored junior team members through technical guidance and collaboration with editorial staff to align software features with the organization's vision.

Junior Full Stack Developer

June 2017 – February 2019

Varsity Newspaper (University of Cape Town), Cape Town, Western Cape

- Developed and maintained core website components using the Django framework and Python to ensure continuous system operation and a user-friendly interface for the university community.
- Engineered custom administrative tools by building front end interfaces that allowed non-technical editorial staff to manage complex content uploads efficiently.
- Managed technical infrastructure stability by configuring server side hosting environments and performing hardware maintenance.

Software Engineering Intern

November 2018 – January 2019

CSIR, Stellenbosch, Western Cape

- Designed a full stack monitoring application by integrating MySQL database data with a frontend interface to track estuary feed flow for environmental research
- Developed data visualization components using JavaScript to provide researchers with real-time insights into environmental data trends.

Software Engineering Intern

November 2017 – February 2018

CSIR, Pretoria, Gauteng

- Developed an automated web bot using Node.js and JavaScript to autonomously scan the Cmore application for real-time updates.
- Engineered a notification system by integrating with the Twitter API to broadcast detected changes instantly to followers and enhance user engagement.

Networking Architecture Intern

July 2017 – August 2018

CSIR, Pretoria, Gauteng

- Conducted technical systems research by writing a comparative review of network orchestrators to evaluate implementation strategies for ETSI NFV MANO specifications.
- Evaluated different network orchestration models through literature review to determine the most efficient architecture for software-defined networking.

CERTIFICATES

- | | |
|--|------|
| • Microsoft Azure Fundamentals AZ 900 | 2025 |
| • Harvard University Programming with Python CS50P | 2025 |
| • FNB App Academy Full Stack Development Certificate | 2025 |
| • Cisco Networking Academy Python Essentials | 2025 |

SKILLS

Languages: Python, Java, JavaScript, HTML CSS, SAAS.

Engineering: API Design & Integration, System Architecture, Technical Documentation.

Database & Cloud: MySQL, SQLite, Microsoft Azure.

Frameworks & Tools: Django, Node.js, Git/GitHub, Linux, Bash, JSON, Bootstrap, VS Studio

ACTIVITIES

Student Mentor: University of Cape Town Residence

Secretary: Student Representative Council (Grade 12)

Placement Facilitator: WeThinkCode
